# LED Flush Mount

## START FROM HERE

• Make sure **POWER** is **COMPLETELY OFF** at the fuse box
• Have your fixture installed by a qualified licensed electrician
• Prepare everything in a clear area
• Wear gloves at all time during this installation
• Read instructions carefully before you start assembly
• Keep this installation sheet for future reference
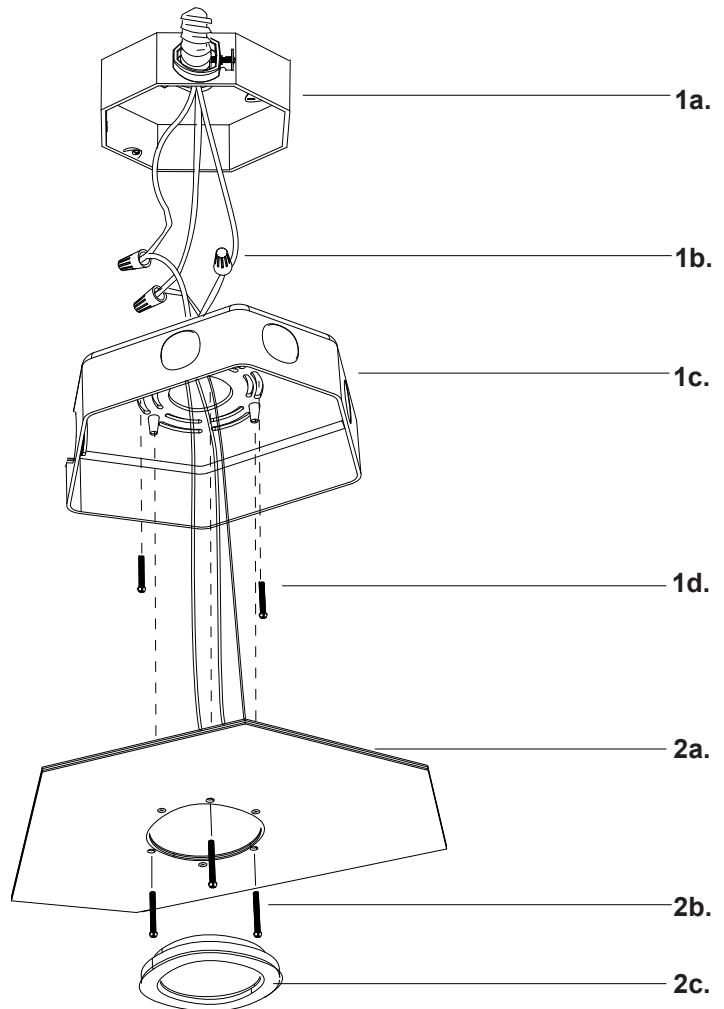

**Technical Support:** 1-855-855-8926

**Please Note:**
• All Kuzco LED fixtures come with pre-wired LED module(s).
• Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
• For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.

**Note: Conduits for multiple flush mount connection not included.**

There are two methods for installation, direct from a junction box **page 01** or in series **page 02.**

**1.** **If you're connecting direct to a junction box**
Remove the fixture from its original packaging. Next, remove the mounting box **(1c)** from within the canopy **(2a)** by un-threading the glass cover **(2c)** and removing the three screws **(2b)**.
Secure the mounting box **(1c)** to the junction box **(1a)** using screws **(1d)** provided in the hardware package.

**2.** Connect all wires correctly black to black "L", white to white "N" and the ground wire with provided marettes **(1b)** from the hardware package. Attach the canopy **(2a)** to the mounting box **(1c)** by using the three screws **(2b)** provided.

**3.** Once this is complete, thread the glass cover **(2c)** to the canopy.

**4.** You have now completed the installation of your fixture, enjoy.

## START FROM HERE

- Make sure **POWER** is **COMPLETELY OFF** at the fuse box
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in a clear area
- Wear gloves at all time during this installation
- Read instructions carefully before you start assembly
- Keep this installation sheet for future reference

**Technical Support:** 1-855-855-8926

**Please Note:**
- All Kuzco LED fixtures come with pre-wired LED module(s).
- Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
- For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.

**Note: Conduits for multiple flush mount connection not included.**

There are two methods for installation, direct from a junction box **page 01** or in series **page 02**.

**1.** **If you're connecting in series,** remove the fixture from its original packaging. Next, remove the mounting box **(1b)** from within the canopy **(2a)** by un-threading the glass cover **(2c)** and removing the three screws **(2b)**. Secure the mounting box **(1b)** to the wall or ceiling using the wood screws **(1e)** and plastic anchors **(1a)** provided in the hardware package. Attach the firestop plate **(1d)** to the mounting box **(1b)** by using the two longer screws **(1f)**. Screw in straight from the box to the wall or ceiling.

**2.** Connect all wires correctly black to black "L", white to white "N" and the ground wire with provided marettes **(1c)** from the hardware package. Attach the canopy **(2a)** to the mounting box **(1b)** by using the three screws **(2b)** provided.

**3.** Once this is complete, thread the glass cover **(2c)** to the canopy.

**4.** You have now completed the installation of your fixture, enjoy.

## Template Instructions

**1b.**

**Guide hole indicator**

**1a.**

**Illustration 1**
**(Example Only)**

**Guide holes**

**\*Conduits for multiple flush mount connection not included.\***

**\*The templates are highly recommended if you are connecting in a series.\***

**1.** Use the template **(1a)** provided within the hardware package to accurately navigate where to create your guide holes according to your pattern.

**2.** First, install the mounting box to the main wire source connected to the the junction box. **(Note: There is no need to drill guide holes for the template with the electrical junction box)**

**3.** Layout your next template **(1a)** and mark two guide holes for mounting installations.

**4.** Remove the template **(1a).** Drill the guide holes of the template and place the mounting box **(1b)** for installation. Make sure the two holes match with the hole indicators **(Illustration 1)**. Start the installation of the series by following the **first page of the installation sheet** followed by the **second page.** Continue to layout the next template and repeat the same steps.
