

**B → C → D → E → F → G → A → H → I → J**

1. Carefully unpack and identify all parts referring to illustration for parts identification.
2. Turn the power to the installation point OFF.
3. Unravel the supply and ground wires and pass them through the center hole of stem (B), top assembly (C), cap (D), finger ring (E) and loop (F).
4. Carefully install the top of stem (B) to the swivel at the underside of top assembly (C).
5. Place cap (D) to the top assembly (C), securing with finger ring (E). Then install loop (F) over the nipple onto the top assembly (C).
6. With the help of another person, carefully attach the top ends of chain of the fixture body (A) to the hook on top assembly (C), allowing the bottom end of stem (B) to insert into the protruding nipple of socket assembly (G).
7. Thread finial (H) onto the coupling of the bottom of socket assembly (G).
8. Place glass (I) to the ring of fixture body (A), securing with clip (J) of the fixture body (A).
9. Install proper bulbs (not provided) to the sockets referring to the marking and/or labels on the fixture for maximum wattage.
10. Restore the power to the installation point ON.
11. Assembly is completely. Retain this sheet for future reference.
