

ASSEMBLY INSTRUCTIONS

1. Carefully unpack and identify all parts referring to illustration for parts identification.
2. Turn the power to the installation point OFF.
3. Align the holes of the support arm (F) and fixture body (A) together, securing with finials (B). Carefully insert all the wires at the bottom of the support arm (F) into the wiring slot.
4. Install the top of the support arm (H) to the coupling of the loop assembly (C), securing with screws(G). Then align the holes of the support arm (H) and fixture body (A) together, securing with finials (B) as shown in the diagram. Repeat the process for the remaining support arms (H).
5. Carefully install glass shade (D) and candle sleeve (E) onto the socket of the fixture body (A).
6. Refer to the additional installation instructions included with the product for wiring and installation.
7. Install proper bulbs (not included) into each socket referring to the markings and/or labels on the fixture for maximum wattage.
8. Restore power to the installation point and retain this sheet for future reference.
