The Bening Small Post Light is one of a number of fixtures in our Twelfth Street collection of outdoor lighting that features a Trilux finish, the next generation of high-performance, weather-resistant finishing technology brought to the market exclusively by Currey & Company. The coating provides three levels of protection, and is fade resistant, crack resistant and rust resistant. We guarantee the finishes applied to our Twelfth Street pieces for five years. The metal on this post light in the collection has been treated to our midnight finish that surrounds seeded-glass panes that turn the illumination to a soft glow behind the geometric detailing.
