

## What is included in this Plug-in Kit?

## Installation steps:

1. Disconnect both heater and the 3-prong plug from the power source
2. Remove the locknut from the cable gland
3. Insert the cable gland through the hole on the junction box and use the locknut to fix the cable gland from the inside of the junction box
4. Run the wire from the 3-prong plug into the cable gland and use the High-Temperature Marrette to complete the wire connections inside of the junction box
5. Secure the cable gland by rotating the thread-lock sealing nut to complete the cable gland installation
6. Install the battery in the remote control's battery compartment, ensuring the battery's polarity is correct
7. Plug the wireless remote-control outlet (the receiver) into a standard AC electrical wall socket, then plug the 3-prong plug from the heater into the receiver
8. Complete the pairing process for the wireless remote control with the receiver
9. Use the remote control to remotely control the power on and off the heater
