

B → A → C → D → E

1. Carefully unpack and identify all parts referring to illustration for parts identification.
2. Turn the power to the installation point OFF.
3. Remove the screws (E) from the arm of the fixture body (A).
4. Install the loop (B) into the nipple of the fixture body (A).
5. Carefully align the holes on the ring (D) and glass (C) to the fixture body (A), securing with screws (E).
6. Refer to the installation instructions included with the product for the wiring and installation.
7. Install proper bulbs (not provided) into the sockets referring to the marking and/or labels on the fixture for maximum wattage.
8. Restore the power to the installation point and retain this sheet for future reference.

## Important note:

**Glass is hand blown. Each piece has a slight variance on thickness and weight. Do not mix the glass with those from other fixtures.**
