

FOR YOUR SAFETY WARNING: BE SURE THE ELECTRICITY TO THE WIRES YOU ARE WORKING ON IS SHUT OFF; EITHER THE FUSE IS REMOVED OR THE CIRCUIT BREAKER IS SHUT OFF. GENERAL You don't need special tools to install this fixture. Be sure to follow the steps in the order given. Under no circumstances should a fixture be hung on house electrical wires, nor should a swag type fixture be installed on a ceiling which contains a radiant type heating system. Read instructions carefully. If you are unclear as to how to proceed, consult a qualified electrician. **NOTE: Proper wiring is essential for the safe operation of this fixture.**

ASSEMBLY INSTRUCTIONS

5019PHB & 5019PHXL & 5019PHXXL

Line art shown may not exactly match the fixture enclosed. However, the installations do apply to this fixture.

READ & SAVE

INSTALLATION & OPERATION INSTRUCTIONS

TOOLS & MATERIALS REQUIRED

Screwdriver	Wire Cutters
Adjustable Wrench	Wiring Supplies

CAUTION

Prior to assembly, refer to ELECTRICAL CONNECTIONS section. If you do not have electrical wiring experience, refer to a do-it-yourself wiring handbook or have your fixture installed by a qualified licensed electrician.

GENERAL

1. Be sure to read these instructions and review the diagrams thoroughly before beginning.
2. Electrical connections must be in accordance with local codes, ordinances, or the National Electric Code. If you are unfamiliar with methods of installing electrical wiring, secure the services of a qualified licensed electrician.
3. Before starting the installation, disconnect the power by turning off the circuit breaker or by removing appropriate fuse at fuse box. Turning the power off at the light switch is not sufficient to prevent electrical shock.

PREPARE THE FIXTURE

NOTE: First turn off electricity

- FINAL ASSEMBLY**
1. Pull the black, white and ground wires out of mounting post.
 2. While supporting the fixture, connect electrical wires. If your post has a ground wire (green or bare copper), connect the fixture ground wire to it. If not, consult your electrician for proper grounding.

ELECTRICAL CONNECTIONS 120V~, 60Hz

Connect white wire(s) from fixture to white neutral wire from supply circuit.

Connect black wire(s) to black hot wire from supply circuit. Connect green wire to green or bare wire or grounding screw on mounting bracket. In all cases grounding conductor to earth must be used. Use UL/CSA Listed wire connects suitable for the size, type, and number of conductors. No loose strands or loose wires should be present. Secure wire connectors with UL/CSA Listed electrical tape.

After wires are connected, tuck them carefully inside the post cup.

3. Align the lantern with mounting post and secure with screws.
4. Glass install & replacement:
①Door glass: Pull up the glass clip, insert the glass into the bottom groove, press the glass clip against the glass;
②Middle frame glass: Unscrew the screws(1), take away the post fitter group(2), install the back glass enter from the side of the middle frame first, gently push the top edge into the upper groove and lower the bottom edge into the lower groove. install the side glass enter through the door frame, same as back glass install way. finally secure the screws(1) (Be careful of glass cutting hands)
5. Installation is complete. Turn on the power at the circuit breaker or fuse box. Turn the light switch on to activate the fixture.

CAUTION: LED fixtures can operate at high temperatures please use caution when touching during operation or after operation.

Cleaning: To clean, wipe fixture with a damp soft cloth. Then dry immediately with a dry soft cloth. Clean glass with a mild soap. DO NOT use chemical cleaners or abrasive materials such as scouring pads or powders, steel wool or abrasive paper.

Warning:

Read instructions carefully. If you are unclear as to how to proceed, consult a qualified electrician. NOTE: Proper wiring is essential for the safe operation of this fixture.

Please observe local building/electrical codes regarding the installation of your post fixture. Please keep in mind your geographic location and the depth that the ground freezes to, when deciding the depth of your installation.
